SUMMARY

Flutter Developer with practical experience designing and developing cross-platform mobile applications using Flutter, Dart, Firebase, Node.js, Express.js, MongoDB, and Cloud Firestore. Skilled in RESTful APIs, Firebase Authentication, GetX, JWT Authentication, Git, and responsive UI design. Passionate about building scalable applications and continuously learning modern mobile development technologies.

SKILLS

- Frontend: Flutter, Dart, GetX, State Management (Provider/Riverpod)
- Backend: Node.js, Express.js, REST API Development
- Database: MongoDB, Firebase Firestore, Supabase
- Authentication: JWT, Firebase Auth
- Tools & Practices: Git, GitHub, Postman, VS Code, Android Studio, Agile/Scrum, Cloudinary, ZegoCloud

CERTIFICATIONS

- Dart Programming — Infosys Springboard (35 hrs)
- Flutter (Beginner) — Infosys Springboard (9 hrs 49 min)
- Mobile App Development using Flutter (Intermediate) — Infosys Springboard (44 hrs 37 min)

PROJECTS

Chat X — Flutter, GetX, Firebase Auth, Cloud Firestore, Cloudinary, Node.js, Express.js, ZegoCloud Jul 2026

Repo: github.com/Naveed-Ahmed-21/Chat-X

- Developed a real-time cross-platform chat application using Flutter, GetX, Firebase Authentication, and Cloud Firestore
- Built secure user authentication, real-time messaging, and user profile management with Cloudinary image uploads
- Implemented chat rooms, user search, live message synchronization, and a responsive UI using GetX state management

Smart Canteen System with Admin Dashboard — Flutter, Firebase, Firestore Nov 2025

Repo: github.com/Naveed-Ahmed-21/canteen-app-with-admin-dashboard

- Developed a dine-in food ordering platform with a dedicated admin dashboard, serving both end-users and administrators
- Implemented secure backend APIs and role-based authentication for user and admin access levels
- Designed a normalized Firestore database schema to manage orders, users, and inventory efficiently

Dual Tap Game — Flutter Sep 2025

Repo: github.com/Naveed-Ahmed-21/Dual-Tap-Game

- Built an interactive two-player mobile tap game with real-time input handling for simultaneous multiplayer interaction
- Optimized rendering and state updates to maintain smooth performance during rapid tap events
- Designed custom UI and branding, including a native splash screen and player-specific visual themes

Full Stack To-Do App — Flutter, Node.js, MongoDB May 2025

Repo: github.com/Naveed-Ahmed-21/ToDo-List-App

- Developed a task management application with a custom Node.js/Express backend
- Implemented JWT-based authentication for secure, multi-user task access
- Integrated Flutter frontend with backend REST APIs for real-time task synchronization

Campus Placement Management System — React.js, Node.js, MongoDB Jan 2025

Repo: github.com/Naveed-Ahmed-21/campus-placement-management-system

- Built a full-stack web platform to manage student registrations and placement workflows for the college
- Developed REST APIs for user management and real-time application tracking
- Designed an efficient MongoDB schema, reducing redundant data storage across student and company records

EDUCATION

B.Tech in Information Technology, Government College of Engineering, Erode 2023 – 2027

CGPA: 7.63

LEADERSHIP

Expo Head, HackXpo'26

- Led and coordinated a 4-member technical team to manage project planning, execution, and presentation for the technical expo
- Oversaw project progress, delegated tasks, ensured timely completion, and facilitated collaboration between team members to deliver successful project demonstrations
